Software Developer with a proven ability to adapt in both self-starting and collaborative environments. I am eager to obtain a challenging position at a prestigious company to produce solutions with code that will expand my learning and build upon my developer skills.

Willing to relocate: Anywhere

Work Experience

Python(Django) Backend Developer

ADA Global Concept - Brazil(Remote)

December 2021 to March 2023

• Design and develop server-side code to support mobile and web applications.

• Data storage and database creation and maintenance.

• Integration of third-party APIs or services into existing systems.

• Build RESTful APIs for web and mobile apps.

• Troubleshoot and debug server-side issues.

• Collaboration with front-end developers, product managers, and other stakeholders in order to create and launch new features.

• Optimize the performance of server-side and database queries.

• Deploy code into production environments and manage servers, infrastructure, and other resources.

• Participating in agile development processes such as daily stand-ups, and sprint planning, and contributing to the team's success by sharing knowledge and skills with others.

Full Stack Developer

SONIPS Group of Schools - Lagos

January 2021 to February 2022

• Frontend user interfaces are developed using frontend frameworks such as React.

• Building backend services and APIs using Django or other backend frameworks and integrating with different data storage systems like MySQL and PostgreSQL.

• Developed and maintained maintainable testable code. Applied best practices in software development, such as code reviews, version control, code review, and automated testing.

• Work with designers, product managers, and other developers to integrate features seamlessly.

• Troubleshooting complex issues, identifying performance bottlenecks, and implementing security measures that protect user data.

• Stayed current with the latest web development trends and technologies and actively suggested code improvements and optimizations.

Front End Developer

Anchor University Lagos - Lagos

April 2020 to December 2020

- Assist in the development and design of web application user interfaces.
- Developed clean, efficient, and easily maintainable HTML, CSS, or JavaScript code.
- Working with the team to create and maintain the code base and improve documentation.
- Participating in code review and testing to ensure quality code.
- Troubleshooting and debugging issues within the frontend codebase.
- Keep up-to-date on the most recent front-end technologies and trends (Learnt react).
- Contributing to the creation of a responsive and mobile-friendly design.
- Integration with web services and backend APIs

Undergraduate IT Intern

Hafol Resources - Lagos
February 2020 to April 2020

- Continuously followed up with several clients to verify optimal customer satisfaction following support engagement and problem resolution.
- Went to various sites for project implementations like access control systems and CCTV installation.
- Set up a meeting environment for stakeholders.
- Completed duties assigned to me and consistently produced a high volume of work.

Education

Bachelor's Degree in Computer Science

Anchor University Lagos - Lagos, GU
October 2017 to September 2021

Skills

- Communication
- Presentation
- Team work
- Time management
- Python
- JavaScript
- Django
- ReactJS
- Cloud services(AWS (S3/Amplify))
- Git & GitHub
- SPSS
- Microsoft packages(Word, Excel, PowerPoint)

Languages

- English - Fluent
